

W3 Changed to external antenna (standard router)

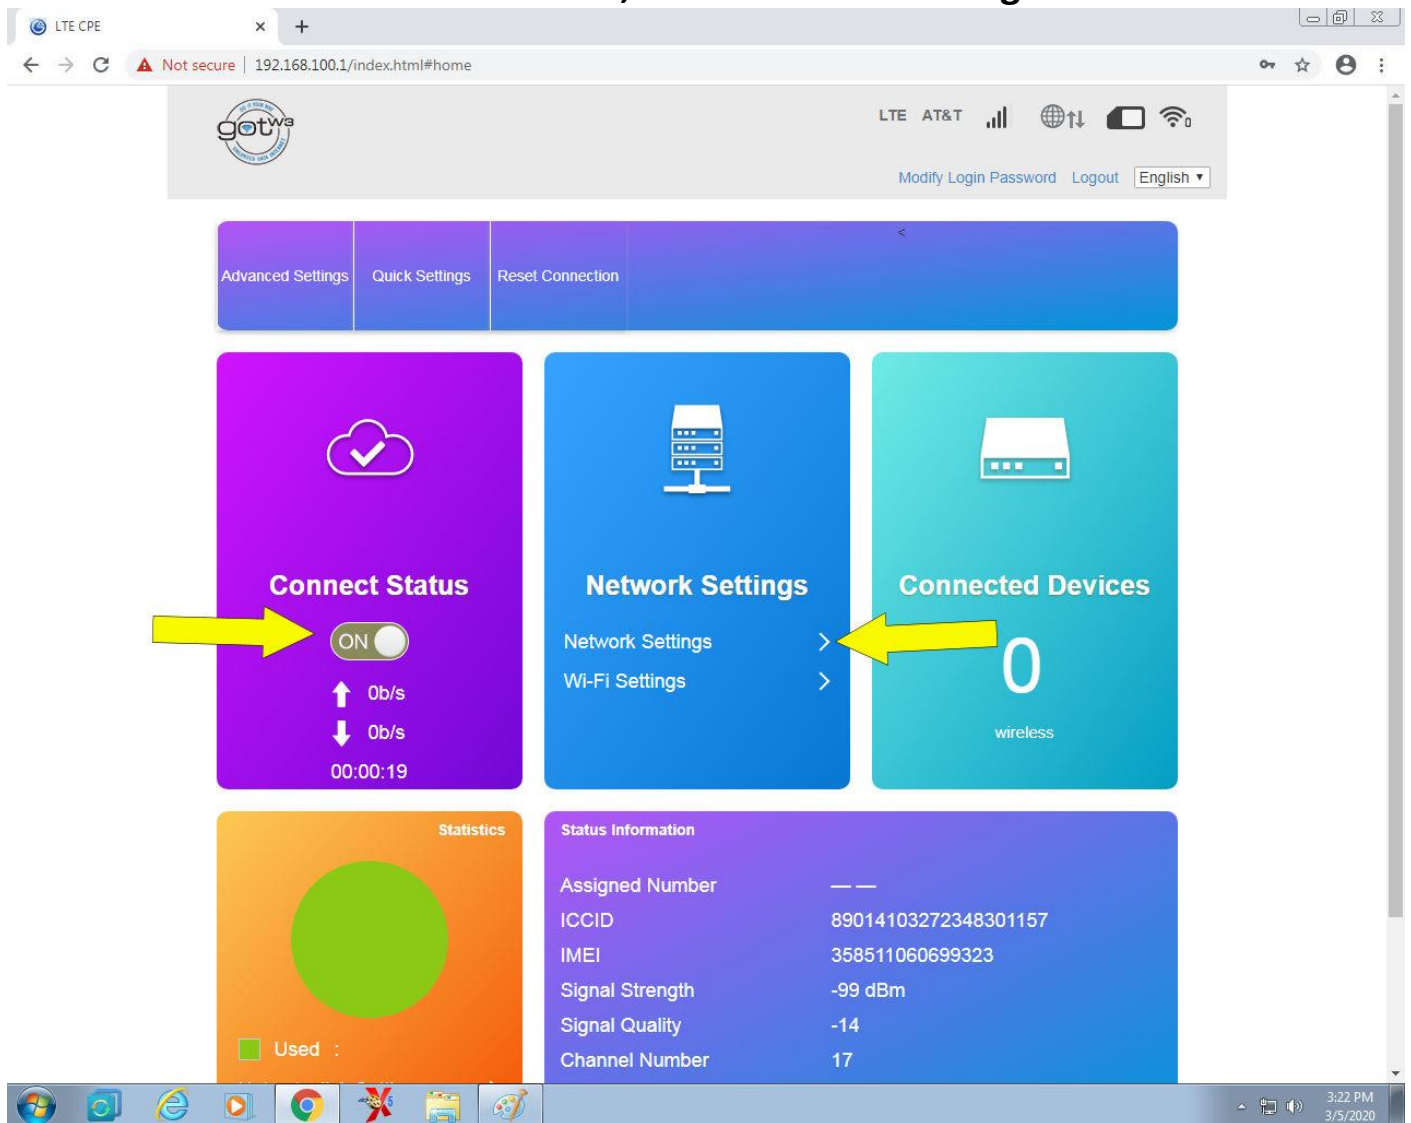

To switch the setting from standard modem antenna to external antenna:

First open a browser (Preferably Google Chrome) and type in 192.168.100.1 and hit ENTER

The Password to type in is: admin

Once logged in, First Under Connection Status, turn the status to **OFF**
Once set to off, Click Network Settings.

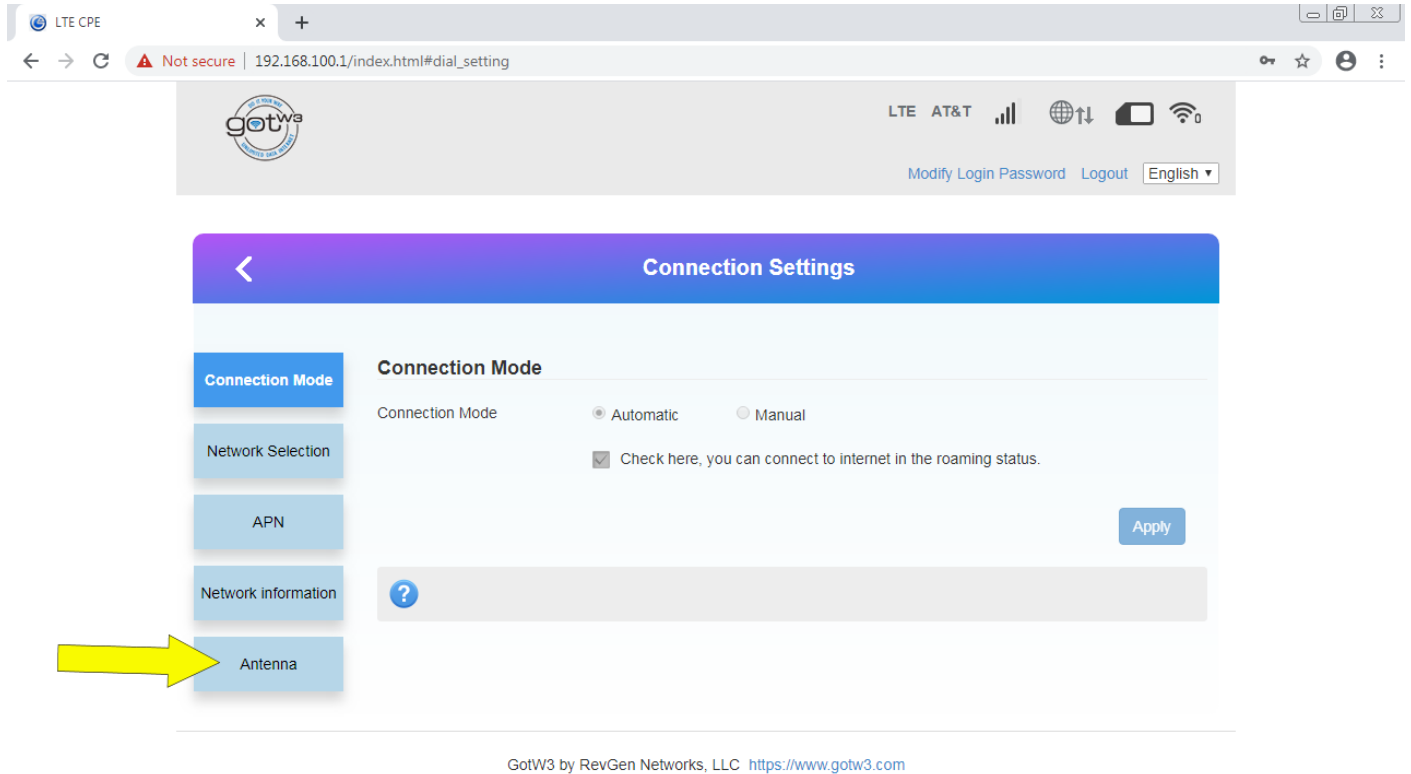

The screenshot shows the gotvwa LTE CPE web interface. At the top, there is a navigation bar with the gotvwa logo, LTE AT&T signal strength, and icons for globe, power, and Wi-Fi. Below the navigation bar are three tabs: Advanced Settings, Quick Settings, and Reset Connection. The main content area is divided into several sections:

- Connect Status:** A purple card with a cloud icon and a checkmark. It features a toggle switch currently set to **ON**. Below the toggle, it shows upload and download speeds of 0b/s and a connection time of 00:00:19. A yellow arrow points to the toggle switch.
- Network Settings:** A blue card with a server icon. It lists "Network Settings" and "Wi-Fi Settings", both with right-pointing chevrons. A yellow arrow points to the "Network Settings" chevron.
- Connected Devices:** A teal card with a router icon. It displays "0" wireless devices.
- Statistics:** An orange card with a green circle and a "Used" label.
- Status Information:** A purple card displaying the following details:

| | |
|-----------------|----------------------|
| Assigned Number | --- |
| ICCID | 89014103272348301157 |
| IMEI | 358511060699323 |
| Signal Strength | -99 dBm |
| Signal Quality | -14 |
| Channel Number | 17 |

The Windows taskbar at the bottom shows the time as 3:22 PM on 3/5/2020.

Once in Connection Settings, Click **Antenna**

Connection Mode Automatic Manual

Check here, you can connect to internet in the roaming status.

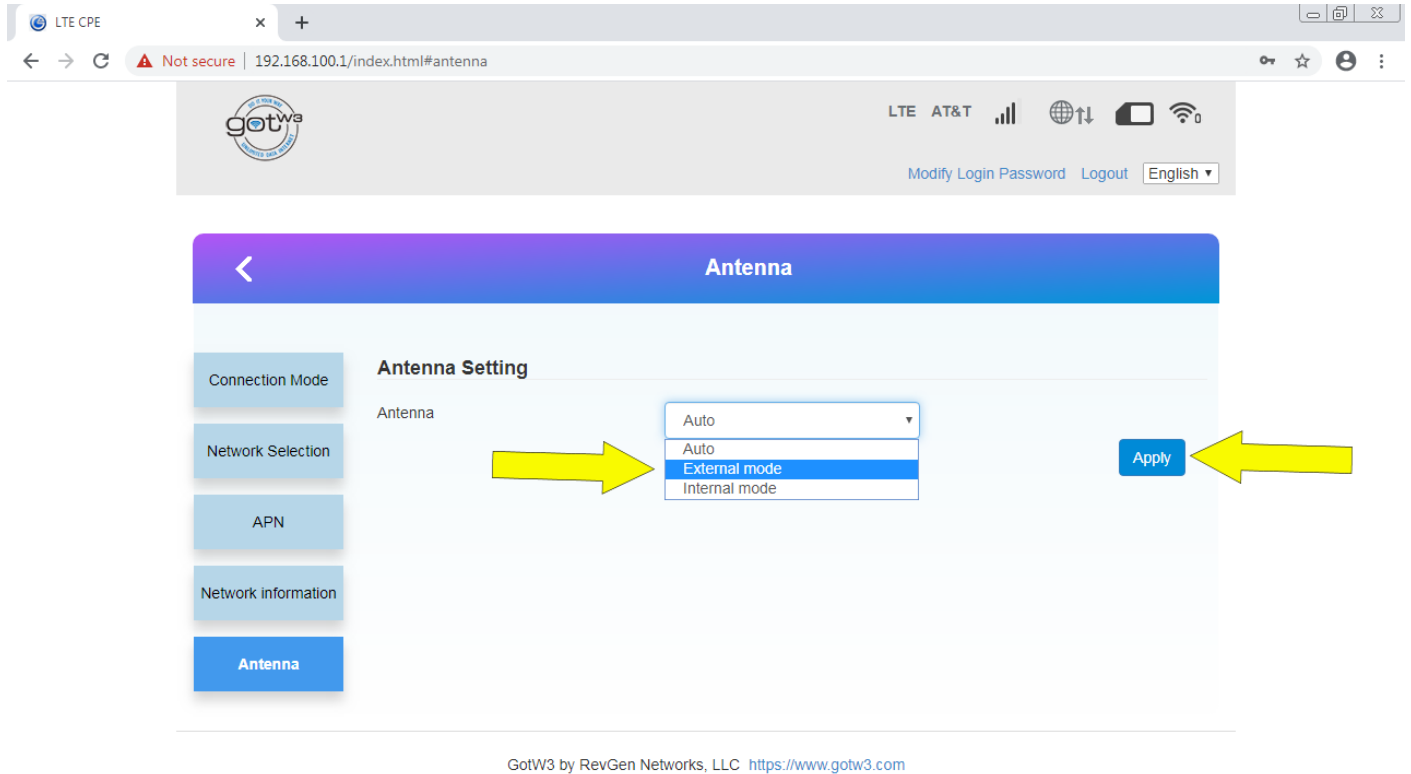

Apply

?

Antenna

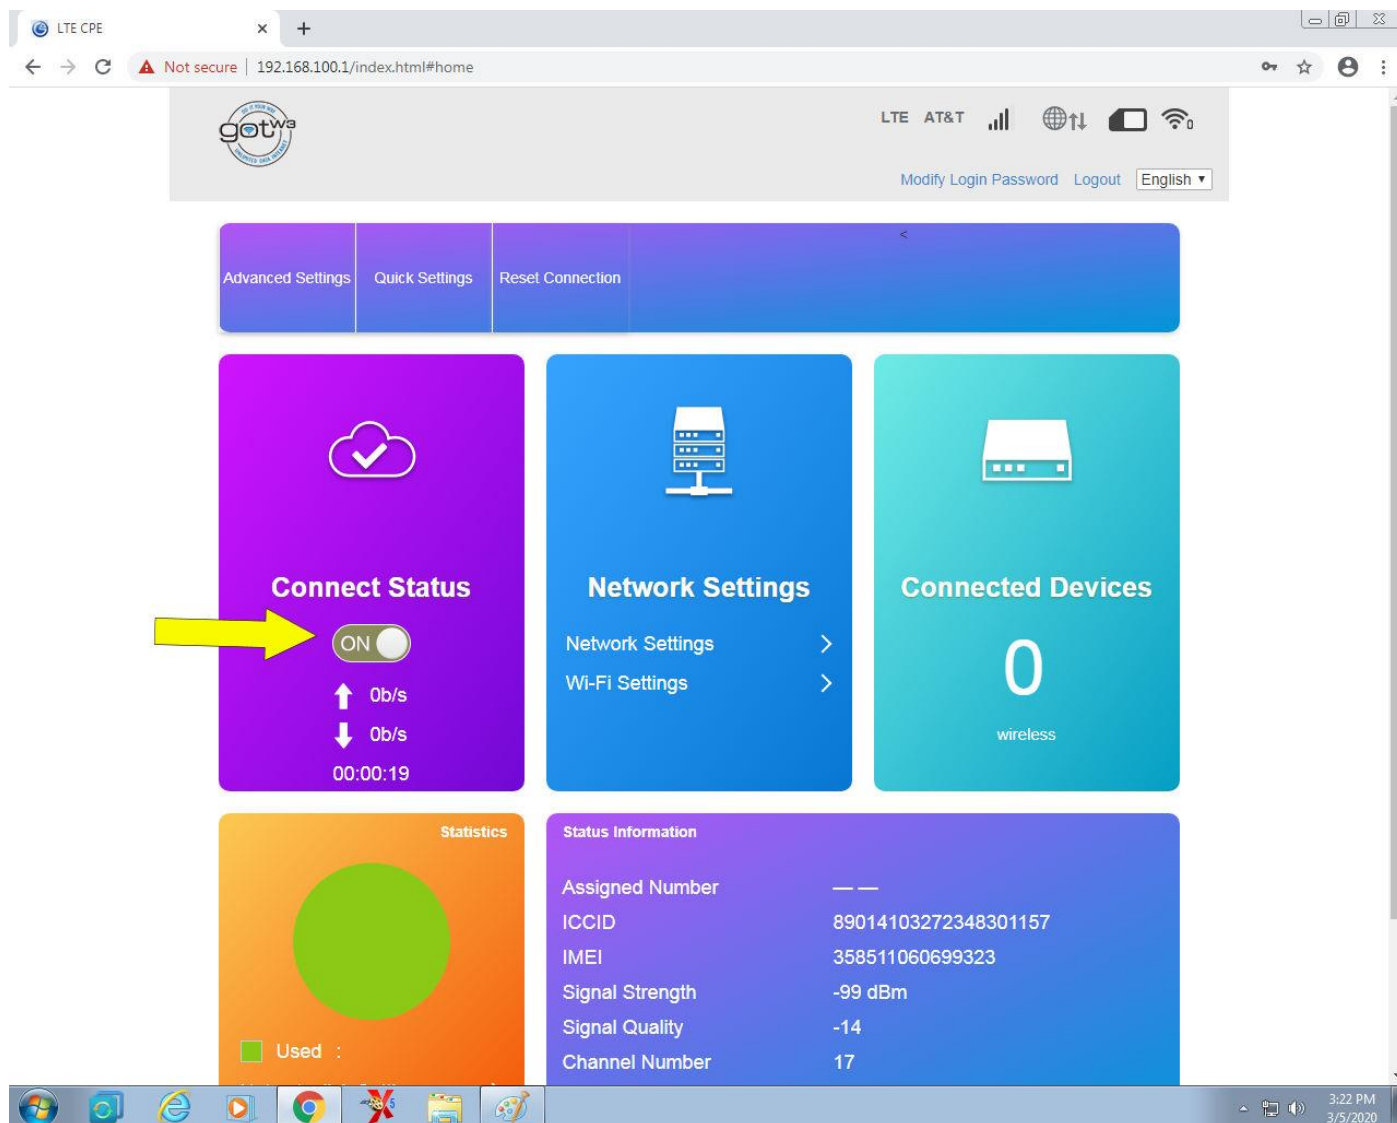

GotW3 by RevGen Networks, LLC <https://www.gotw3.com>

Under Antenna settings, switch from Auto to **External Mode**, then click **Apply**

The screenshot shows a web browser window displaying the GotW3 Antenna settings page. The page title is "Antenna". On the left, there is a sidebar with menu items: "Connection Mode", "Network Selection", "APN", "Network information", and "Antenna" (which is highlighted). The main content area is titled "Antenna Setting" and contains a label "Antenna" followed by a dropdown menu. The dropdown menu is open, showing three options: "Auto", "External mode", and "Internal mode". A yellow arrow points to the "External mode" option. To the right of the dropdown menu is a blue "Apply" button, with another yellow arrow pointing to it. The page footer contains the text "GotW3 by RevGen Networks, LLC https://www.gotw3.com".

Then click the Gotw3 logo to go back to the home screen and turn the connect status to **ON**

The screenshot shows a web browser window displaying the Gotw3 interface. The browser's address bar shows the URL `192.168.100.1/index.html#home`. The interface includes a navigation bar with the Gotw3 logo and links for "Modify Login Password", "Logout", and "English". Below this is a menu with "Advanced Settings", "Quick Settings", and "Reset Connection". The main content area features three large colored cards: "Connect Status" (purple), "Network Settings" (blue), and "Connected Devices" (teal). The "Connect Status" card has a yellow arrow pointing to a toggle switch labeled "ON". Below the toggle are indicators for upload and download speeds (both at 0b/s) and a timer (00:00:19). At the bottom, there are two more cards: "Statistics" (orange) with a green circle and "Status Information" (purple) with a table of device details.
